

Invited Speaker

Assoc. Prof. Takeo Hyodo
Nagasaki University Japan

Takeo Hyodo received his B. Eng. degree in applied chemistry and M. Eng. degree in materials science and technology in 1992 and 1994, respectively, and Dr. Eng. degree in 1997 from Kyushu University, Japan. He was a research associate from 1997 to 2005 and an assistant professor from 2005 to 2010 at Nagasaki University, Japan, and then he has been an associate professor at Nagasaki University, Japan, since 2010. He has published more than 100 peer-reviewed papers in international journals. His research interests are development of various electrochemical devices such as chemical sensors (mainly gas sensors) and batteries, and design of the related mesoporous and macroporous materials.
