

Invited Speaker

Prof. Dr. Hiromitsu Nishizaki
University of Yamanashi, Japan

Hiromitsu Nishizaki received the M.Eng. degree in information and computer science from the Toyohashi University of Technology in 2000 and the Ph.D. degree in Engineering from the Toyohashi University of Technology in 2003. He joined the Interdisciplinary Graduate school of Medicine and Engineering, University of Yamanashi as a research assistant in 2003.

He was a visiting researcher at National Taiwan University from August 2015 to March 2016. Since 2016 he has been an associate professor at in the Graduate School of Interdisciplinary Research, faculty of engineering, University of Yamanashi. His research interests include speech processing, spoken language processing, natural language processing, and machine learning (deep learning). Recently, he studies data augmentation for making good models for speech recognition, spoken document retrieval, spoken term detection, emotion analysis on a spoken utterance and sound event classification. Besides, he develops a speech recognition system for multiple language. He has published more than 70 peer-reviewed papers in international journals and conferences. He is a member of IEEE and a senior member of the Institute of Electronics and Information and Communication Engineers (IEICE).
